Water Supplier Name: GSW – Norwalk **Water Supplier ID Number:** CA1910098 **Water Audit Period:** Calendar 2019

Water Audit & Water Loss Improvement Steps:

Golden State Water Company has recently completed an effort with an outside contractor to update and develop a company-wide water loss control program. This new program is intended to be implemented by all water systems throughout the company. They have demonstrated a commitment toward the implementation of programmatic efforts aimed at reducing non-revenue water amounts throughout their company. It was recognized and discussed that the LLI value for this audit was lower than 1.00 and the cause of this low LLI should be further investigated. One potential source value to investigate further is relative to the meter accuracy value of the imported water connections. It is highly recommended that every effort be made to work with their imported water supplier to get annual volumetric meter accuracy testing done on all import water interconnection meters. It is also recommended that this system place consideration on instituting an active leak detection program.

Certification Statement by Utility Executive:

This water loss audit report meets the requirements of California Code of Regulations Title 23, Division 2, Chapter 7 and the California Water Code Section 10608.34 and has been prepared in accordance with the method adopted by the American Water Works Association, as contained in their manual, *Water Audit and Loss Control Programs, Manual M36, Fourth Edition* and in the Free Water Audit Software version 5.
